

COVID-19 Announcement

March 25, 2020

As we navigate the uncertainties and challenges related to COVID-19, we would like to reassure you that **Wilson Trailer Company remains open for business, with all manufacturing and service operations running at full capacity as of Wednesday, March 25, 2020.** With many states and counties issuing “stay at home” orders we want to share with you that Wilson Trailer is considered an “essential business” as designated by Presidential Policy Directive 21, www.cisa.gov/identifying-critical-infrastructure-during-covid-19.

Our priority is to provide the same level of customer service you have come to expect from our company while also prioritizing the health and safety of our customers, employees and suppliers. To that end, we have taken the following precautionary measures:

-) Added additional cleaning and disinfecting to all of our facilities
-) Practicing social distancing
-) Moved a number of employees to work from home
-) Closed our lobbies to the public

Despite these changes we are still selling, delivering and servicing trailers, selling parts and accepting deliveries from suppliers. All of our locations have phone numbers to call posted on their entrances or they can be found on our website at www.wilsontrailer.com/contact/. We have implemented new procedures to service our customers while limiting contact. We are also in constant communication with our vendors to maintain the integrity of our supply chain, and will alert customers immediately should we anticipate potential delays.

We value your business and are committed to serving you during this difficult time.
